5. Car Mileage

C Program

```
#include <stdio.h>

int main() {
    float mileage;
    int petrol, distance;
    scanf("%f %d %d", &mileage, &petrol, &distance);

    if (mileage * petrol >= distance)
        printf("Can reach");
    else
        printf("Cannot reach");

    return 0;
}
```

Note: Maximum distance = mileage × litres of petrol.
